Part B. Give an example of each of the following kinds of arguments. You don't have to make these examples fascinating arguments. Silly ones will do. Each of these arguments has two premisses. Start with a valid or invalid abstract pattern in the blanks on the left, and then fill in the blanks towards the right with matching English sentences.
0. An invalid argument with all the premisses and conclusion empirically false.
prem: Some P are B Some persons are banana-shaped things
prem: All B are G All banana-shaped things are residents of Chicago
concl: All P are G All persons are residents of Chicago

1. An valid argument with all the premisses and conclusion empirically false.
